

Windows and doors supplied to an upmarket residence in Hyde Park.

Solid stuff

Three decades later, local timber manufacturer still going strong

With over 200 years' combined experience and 35 years' manufacturing experience, it's no wonder that RSB delivers large volumes of laminated beams, mouldings, frames and doors of a superb quality.

The company was established in 1980 as 'Randfontein Saligna Beams' for the sole purpose of manufacturing laminated Saligna beams. In 1986, laminated Pine beams were introduced and by 1993, the company moved onto SA Pine mouldings, quickly establishing itself as one of the biggest manufacturers and suppliers in Southern Africa.

In 2003 RSB expanded and moved premises from Randfontein to Chamdor to 18 000m² of factory space, of which 8 000m² was covered with timber-producing and wood-working machinery.

Bathroom sliding louver doors supplied by RSB.

The Nike Soweto Soccer Academy was designed to include 63 x 63 laminated Saligna beams as cladding, highlighting not only the structural integrity of the product, but its bold aesthetic value. Timber supplied by RSB and installed by JB Roofing. Image by RSB.

Predominantly manufacturing two types of beams, Glulam (Saligna) and Lamstock (Pine), RSB also manufacture mouldings, PAR, decking, skirting, flooring, a large variety of architectural mouldings and supply the market with various types of exotic timbers. A recent introduction includes an exciting line of custom doors, frames, window frames as well as I-joists (I-beams).

Both Glulam and Lamstock beams are SATAS approved for health and safety purposes. SATAS monitors the process strictly from beginning to end, making sure that RSB conforms to consistent procedure. All phases of manufacture are strictly controlled.

RSB delivers daily to the Gauteng area with weekly trips made to the Free State, North West Province, Mpumalanga, Limpopo Province, Northern Cape, KwaZulu Natal and Swaziland. Business has also expanded out of South Africa to countries such as Botswana and Swaziland.

The company does not supply the public directly, but supplies all major building and DIY stores in South Africa. RSB supplies top class materials and approved building contractors for various projects.
